

AGRISTRETCH WASTE WRAP

**ABSOLUTELY CLOSED. ABSOLUTELY SOLID.
ABSOLUTELY ECOLOGICALLY SOUND.**

Waste Wrap from Coveris Flexibles Austria GmbH is a film which has been especially developed for packaging waste. Thanks to our many years of experience in the area of agriculture this is the optimal way to transport waste cleanly or to store it for a length of time.

If the bales are wrapped according to instructions with at least 4 layers (six are better) and stored carefully, UV stability and lack of seepage are guaranteed for one year.

BENEFITS

- Absolutely closed
- Troublefree wrapping
- More solidity
- More profitable usage
- Oxygen- and humidity barrier
- Ecologically sound

ADVANTAGES

ABSOLUTELY CLOSED

Waste Wrap guarantees excellent closed bales due to the perfect sealing effect. Plain film edges prevent water from entering the bales.

TROUBLEFREE WRAPPING

Universal processing possibilities due to excellent wrapping properties guarantee troublefree wrapping, even under extreme conditions (e. g. humidity, temperature, size and form of the bale).

MORE SOLIDITY

Waste Wrap is characterized by high punctual- and tear resistance. Important: The properties of the film can be adapted to the customer's needs at any time.

MORE PROFITABLE USAGE

The optimized stretching property guarantees a very high usage profitability.

OXYGEN- AND HUMIDITY BARRIER

Special blown extrusion together with selected types of raw materials give the film the highest oxygen and humidity barrier.

ECOLOGICALLY SOUND

Waste packed in Waste Wrap is no longer a threat to the environment.

Moisture cannot leak out and penetrate into the soil anymore.
